You're holding inCider's Apple II Card Deck

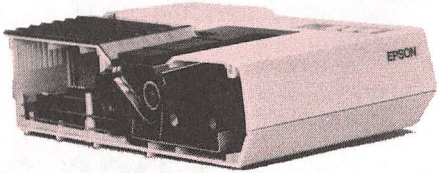

It contains important information
for Apple II users. Open it today.

This direct response card deck contains products and services for Apple II users only. Simply choose the card you're interested in, fill them out, and drop them in the mail. That's all you have to do. Within several weeks you will receive the information you requested. It's that simple, and it's brought to you by inCider, the Apple II journal.

Attention all FX80, FX100, JX, & RX owners:

You already own half of a great printer

Now Only $79.95

Now you can own the rest.

Recent advances have greatly improved both the print quality and operating features of newer dot matrix printers.

The "dotty" look is gone. In its place is NLQ, near letter quality. A feature that produces a printed character almost as sharp as a daisy wheel. (See reverse side.)

Dots-Perfect™

An upgrade kit for EPSON FX, JX and RX printers

IC 5/86

In fact, you may be thinking of replacing your current printer.

The problem is a new model can be quite expensive. And, if you're faced with replacing several printers, the cost is prohibitive.

At a fraction of the price—only $79.95—a Dots-Perfect™ upgrade kit will enhance your present printer with features that deliver better looking documents.

And you can even switch more than 160 printing styles using your printer's control buttons, no matter which software you run.

So don't replace your printer. Upgrade it! Call now and use your Visa, MasterCard, or American Express.

DISKS SSDD!

Dysan • Xidex • Nashua • 3M • Data Encore

A large software manufacturer goofed—they made 1000's of copies of their programs and then they found the bugs in the programs. Instead of re-using all of these disks, they gave us some of them to liquidate. These are top quality 3M, Data Encore, Xidex, Dysan and Nashua disks. These disks have met far more exacting tests than almost all new disks, since each disk has been individually written on and then individually tested for read/write errors according to the exacting specifications of the software manufacturer. They have been bulk erased (degaussed) and are totally blank and ready for formatting. They are complete with envelopes and labels. You can have 1000 disks for $390 (39¢ each), 200 for $90 (45¢ each), or 100 for $49 (49¢ each). Add $5 per 100 disks for shipping and handling. 100% total satisfaction, 30 day guarantee.

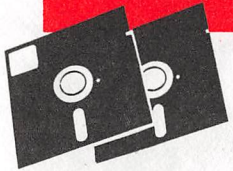

100% Satisfaction Guarantee

If you are not completely satisfied with these disks for any reason, simply call within 30 days of receipt for a complete refund.

Open-Apple

is a monthly newsletter for Apple II users. It's produced by Tom Weishaar, the crazed individual (his banker said he had to be crazy to start an Apple II newsletter in 1985) who wrote *Softalk's* **DOStalk** column and Beagle Bros' **ProntoDOS** software.

Crazy or not, Weishaar's 8-page, typeset, somewhat humorous letter is gaining subscribers at an incredible rate. Here's why:

Stuart V. Hamstra, New York, NY: When I recently subscribed to your newsletter, I had no idea of the wealth of information you would provide me. The November issue alone, in one small sentence, solved a problem that had been bugging me for over a year, in spite of numerous books purchased and several magazines subscribed to.

Clifford E. Landers, Montclair, NJ: Having seen only two issues, I was struck immediately by two things: the technical expertise of the publication, and the enjoyable writing style. How refreshing to find someone who is "computer literate" and also literate in the more traditional sense.

Gerald P. Wantz, Lufkin, TX: Your issue on printer problems is terrific; it's refreshing to pick up an article and find answers explained in such clear detail on such a usually hazy subject.

Allan R. Smalley, Glouster, ONT: I have been affected by exposure to several issues of ***Open-Apple*** at our local Apple group meetings. It seems that the only way to keep my condition under control is to take one issue of ***Open-Apple*** each month.

Karen Lee, Westbrook, ME: ***Open-Apple*** is the greatest thing since my grandmother's deep-dish apple pie.

Paul Statt, Technical Editor, *inCider*: *Open-Apple* is the best Apple II mag I know. Not the second best. You can quote me.

See for yourself with no risk. If you are the type of person who values information you can *use*, flip this card over, enter your name in the upper-left corner, and mail it. We'll send you our current issue and a bill for just $24—your first year's subscription. If you like ***Open-Apple***, pay the bill. If you don't, just write "Cancel" on it and send it back. Come on—join in the fun for at least one free look.

Yes, sign me up for 12 issues of ***Open-Apple*** and bill me $24 when you send my first issue.

"I have never thanked a company for making a product before this time... The BARD is a Winner++. Before the BARD (my wife) found the world of word processing beyond her. Now she uses the Starters level to write letters several times a week. Our daughter has gone through the tutorials and is our Experienced level user. Our sons have now switched from Apple Works to the BARD. The Spell-Checker was instrumental in this decision. I learned the Professional level of the BARD in about a half an hour and have been using it ever since. Please Consider me an automatic new customer for any of your new products... just send them along. (The Rev. Phillip G. Houghton, Waynesberg, PA.)

What you should know about the International Apple Core.

IAC provides many sources of information. Your membership fee brings you twelve issues of **Nibble** magazine. Every page is devoted to Apple systems. Looking for a user group? The IAC can help you find one in your area.

Nibble magazine is devoted exclusively to Apple systems. **Nibble** features more than $50.00 worth of ready-to-run Apple programs in each issue. **Nibble** also features new products, reviews, tips and techniques for learning more about your Apple and having fun doing it.

As a member, you may also subscribe to our Disk of the Month. $60.00 brings you a twelve disk subscription to IAC user contributed software.

The Educational 3 PaK is the first in an ongoing series of theme packaged programs. The three disks of the Educational 3 PaK include the Applesoft Tutorial, Machine Language Tutorial, and Math Tools. Other available 3 PaKs are LOGO, FINANCIAL, and GAMES. Keep an eye out for new 3 PaKs.

The AppleWorks Mailing program (which works in conjunction with AppleWorks and is used for automated form letters) is available exclusively through the IAC and is offered to our members at a discount.

IAC offers a user group package. This includes a subscription to **Nibble** and the DOM for a full year. All for $90.00.

Individually or as a group, you can't lose!
